

How much will you save with an Energy-Star home by J.T. Lewis Builders?

29% over the energy costs of the same home built today without Energy-Star features*

39% over the energy costs of a 15-year-old home*

The Apex home on Lot 71 at Claremont is an Energy-Star home with many green features. What does that mean to you? It means a *significant* savings each month on your energy bill and a *very comfortable* living environment.

Are you living in an older home?

If we built the Apex to code 15 years ago, your energy costs would be:

The Apex Plan As a 15-Year-Old Home	
Annual Cost	Monthly Cost
\$3,456.00	\$288.00

If we built the Apex today without Energy-Star features, your energy costs would be:

The Apex Plan Without Energy-Star Features	
Annual Cost	Monthly Cost
\$2,958.00	\$247.00

So, what does it cost to have an Energy-Star home? A lot less.

The Apex Plan Built to Energy-Star Standards	
Annual Cost	Monthly Cost
\$2,082.00	\$173.00

*Evaluation conducted by Southern Energy Management.
